

# The Drones are Coming: Aerial Imaging for Disaster Response

Univ.-Prof. Dr.-Ing. **Christian Bettstetter**  
Berlin, 17 June 2013

**Lakeside Labs**

# Small Unmanned Aerial Vehicle (UAV)

AscTec Pelican

# Types of UAVs, Flying Robots

Microdrones GmbH

Gatewing  
X100

Parrot  
AR.Drone

AscTec  
Hummingbird

AscTec Falcon

- Quadrocopter, octocopter, fixed wing
- Indoor, outdoor
- Commercial, research platforms, toys
- From 200 € to 30.000 € and above

# Flying Machine Arena

# Small UAVs perform “James Bond theme”

University of Pennsylvania (2012)  
3.5 Million hits on YouTube

# Formation Flight at Cultural Event

Voestalpine Klangwolke, Linz, 2012

# Lakeside Labs – Disaster Management

User defines high-level tasks  
(e.g. observation area)

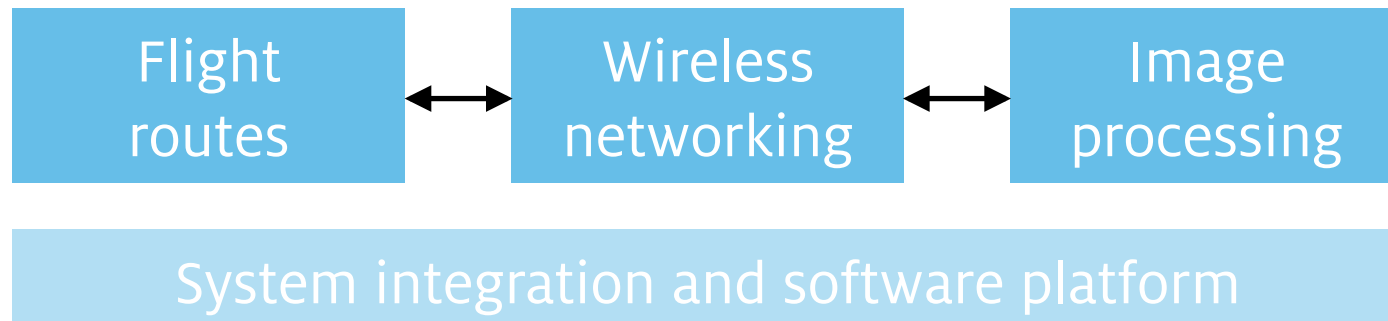

User obtains **real-time**  
high-quality overview image

# Goals and Research Issues

- Develop **autonomous** system for aerial reconnaissance
- Support first responders in **disaster management**
- Use **off-the-shelf**, small-scale, low-altitude multicopters equipped with high-quality cameras and GPS
- Deploy **multiple** drones to achieve fast area coverage

## Research Issues

# Flying High: Multi-UAV Aerial Imaging

# Challenges

- Strong **resource** limitations:  
Flight time, payload, computation
- Coordination of **multiple** drones:  
Centralized vs. distributed approach
- Multimedia network with **dynamic, three-dimensional** mobility
- Non-trivial **user** interface with prompt response
- Aspects of **experimental** research:  
Safety, legal issues
- Application **partners**, project **funding**

# Image Processing: Stitching

Using position data  
(GPS)

Using position  
and orientation  
(GPS and IMU)

Exploiting feature  
detection  
(Image data)

Apparatus and method for generating an overview image of a plurality of images using an accuracy information. European patent pending, EP2423871 (A1), 2012

# 3D Landscape Models in Disaster Areas

- Covering 45 km<sup>2</sup> in Haiti in six days
- System that local people can use
- E.g.: Understand flow of water

Switzerland

# Transportation using a UAV Network

Matternet Inc., Palo Alto, CA

Transport of important goods, such as medicine

# Applications Beyond Disaster Response

3D mapping

Person and object tracking

Industrial site monitoring, police support, accident documentation, and many others

# Concluding Remarks

- Emerging area of research and development
- Challenges due to multidisciplinary and experimental character
- Various applications, several startup companies
- Various legal and privacy issues
- Attractive for students and PhD researchers

# Research Days 2013: Multi-UAV Systems

- Full week of discussions and group work
- Keynotes from top experts (ETHZ, Oxford, TUM, Toronto, ...)
- Participation from academia and application partners
- Demo session and social events
- Potential for joint projects

Lakeside Labs GmbH

Klagenfurt am Wörthersee, Austria

July 8 – 12, 2013
